

Digitalization of the manuscripts

India-Afghanistan Foundation (IAF) with its available resources is now capable of locating and discovering and introducing the rare books. These books are related to the theology, history, literature, Lexicography, literature criticism, pedigree, poetry and Sufism. Some of these books are unknown to the scholars and researchers, which are really rare and not even introduced yet.

The scholars and researchers of the above-mentioned fields could get more information from these books. Most of the digitalized books are related to the history and literature of the centuries back between Afghanistan and India.

IAF is proud to digitalize the following rare and valuable manuscripts first time from Talenga library, Hyderabad to preserve the further damage of the books.

1. A book on pedigree of Saddat (The descendants of prophet Muhammad PBUH)
